## **HODYON ANNOUNCES SALE OF 10H PLATFORM TO THE FOUR SEASONS DIVISION OF STANDARD MOTOR PRODUCTS, INC.**

**Round Rock, Texas, (PRWeb)** – May 10th, 2010 - Hodyon, a manufacturer and distributor of energy-efficient products and systems that reduce the magnitude of climate change, announced today that it has reached an agreement with the Four Seasons Division of Standard Motor Products, Inc., (Four Seasons) for the purchase of its highly successful 10H compressor platform.

Under the agreement, Four Seasons will acquire the manufacturing assets, intellectual properties, inventories and primary sales distribution rights for the 10H. In addition, Four Seasons and Hodyon have entered into a Supply Agreement where Four Seasons will supply 10H compressor products to Hodyon.

“We are extremely pleased to announce the sale of our 10H platform to Four Seasons, the leading supplier of replacement mobile climate control products,” said David Hancock, Chief Executive Officer for Hodyon. “This transaction will enable Hodyon to focus all its resources on developing innovative, energy-efficient products that positively impact global climate change.”

Hodyon recently announced the launch of Dynasys, an auxiliary power unit (APU) which decreases fuel consumption and reduces environmentally harmful emissions by eliminating the need for truck engine idling. Tough legislated regulations throughout cities and states across North America indicate a reduction in idling is an important issue. Over 1 billion gallons of diesel fuel are consumed in the US alone due to engine idling. This translates into annual emissions of approximately 11 million tons of carbon dioxide, 200,000 tons of oxides of nitrogen, and 5,000 tons of particulate matter into our environment. The Dynasys APU will reduce these environmentally harmful emissions by eliminating the need for truck engine idling while decreasing fuel costs to the customer.

Additionally, the company announced in March 2010 a joint development agreement with Fallbrook Technologies, Inc., to develop new compressor technology that will greatly increase fuel efficiency and vehicle fuel economy (particularly at engine idle). This jointly-developed compressor will be designed for the medium and heavy-duty vehicle markets.

### **About Hodyon:**

Hodyon is a manufacturer and distributor of energy-efficient products and systems that reduce the magnitude of climate change. The company is ISO 9001:2000 certified, a two-time award winner

for growth from Inc. magazine, the 59th fastest growing manufacturer in the US and, according to the Austin Business Journal, the 17th fastest growing company in Austin, Texas.
